

Do you hold information or records on Sannomaru's past structure?

「播州姫路城絵図」(中根忠之氏所蔵)三の丸部分抜粋

Himeji City's Municipal Castle Research Center is seeking informational materials pertaining to the structure of buildings that once stood in Himeji Castle's Sannomaru area. In order to ensure historic integrity while considering the restoration of watchtowers and feudal residences (which were lost at the start of the Meiji era), we would like to gather historical documents such as old photos or archives that can show us a 'glimpse of the past' in Sannomaru.

Collection ends 12/31/2018.

Entries will be judged by an inspection committee composed of members of the Japan Castle Research Center Administrative Council. For materials found to hold new information that is

- ① thought to be related and helpful to restoration efforts, or
- ② supplementary to criteria ①

Himeji Castle Protection Society will discern and issue a monetary sum as reward.
